

Protocol for installers against Covid19

This guide has been created to minimize the risks of the spread of the coronavirus and to provide **Health and Safety** Recommendations

1 - Before the service

Take the temperature. If it exceeds 37.5°, do not go out and notify the health centre

When leaving home, wear a mask, coat, gloves and glasses

Request health information from the address where you will do the service

2 - Transport

It is recommended to use the vehicle individually.
If it is necessary to share it, there should not be more than one person per row and the situation between the occupants should be diagonal

Disinfect the vehicle after each use

3 - Before entering

Wash your hands with hydro-alcoholic gel or soap and water

Show the action protocol and explain that exceptional measures are being taken

Maintain social distance (2m)

4 - During the service

Maintain social distance (2m)

Clean the surface of the equipment to be handled

Ventilate during the technicians' stay

Use recommended EPIS

5 - After service

Maintain social distance (2m)

Ventilate during the technicians' stay

Disinfect used tools

Do not dispose of the materials used in the consumer dependency.

Wash clothes at 90° with long programs and without mixing with other clothes

*Recommendations of the Ministry of Health
